

Universal Clips

The Largest Manufacturer of Worm-drive Hose Clamps in Southern Africa.

UniClamp

Heavy Duty Bolted Hose-Clamps

The simplistic, compact and yet highly effective design provides a quality, cost-effective solution for larger clamping applications.

The UniClamp is designed with the set screw recessed into a round trunnion for easy installation and has a guide to prevent the fastener from damaging hoses. No welding minimises the risk of corrosion.

They are suitable for all plastic and rubber hoses. UniClamps are re-useable.

STANDARD UNICLIP SERIES

The Standard Steel Clamp is constructed from a 400-series steel band with zinc-plated carbon steel set-screw and trunnions. Ideal for agricultural, industrial or heavy vehicle applications.

316 STAINLESS STEEL SERIES

This fully stainless steel heavy duty clamp is manufactured from an acid resistant 316 stainless steel band with matching 316 stainless steel set-screw, nut and trunnion.

It is ideal for marine, mining or chemical applications where there is a heavy clamping requirement in a highly corrosive environment.

* Super convenient additional Option The 'Modified Range' Option

The Uniclips Series allows the option of reducing the clamping range in the field (without any special tooling being required) by simply rolling the band over the Trunnion. See diagram.

Our company's policy is one of continuous product innovation, and we reserve the right to change specifications without notice. Any such changes would benefit customers and be driven by our response to market requirements and changing specifications
