

Universal Clips

The Largest Manufacturer of Worm-drive Hose Clamps in Southern Africa.

Worm-drive 'Econ'

Micro Hose Clamps

Lightweight 'Econ' or Micro Hose clamps are ideal for smaller diameter and lighter duty applications such as air & fuel line hoses.

They are available in a standard range which has a 400 series Stainless Steel band with zinc plated carbon steel screw and housing and also in full stainless steel.

The clamp's design has a construction that is free of spot welding and therefore a reduced potential for corrosion.

The narrower 8mm perforated band permits relatively higher sealing pressure with less torque than the standard 12mm band-width clamps.

With the low profile and narrow one-piece housing, easy installation in difficult areas is possible.

The slotted 6mm hex head screw allows for screw-driver or socket installation.

	Dimensions mm	inches
A	19.5	1 1/8
B	9.0	11/32
C	10.2	5/16
D	6.0	1/16
E	8.0	15/32
F	11.5	29/64
G	# see range below	

The 'GMS' Series Full Stainless Steel Econ Micro Clamps

Ideally suited to mining, marine, agriculture and chemical applications; where extra resistance against corrosion is required.

- Manufactured entirely from 300 series Stainless Steel

The 'GM' Series Economy Econ Micro Clamps

Ideally suited to general and automotive applications

- Consists of a 400 series stainless steel band
- Zinc electroplated carbon steel housing
- Zinc electroplated, case hardened and slotted screw

Our company's policy is one of continuous product innovation, and we reserve the right to change specifications without notice. Any such changes would benefit customers and be driven by our response to market requirements and changing specifications
